

SEO-YOON MOON

mrn538@snu.ac.kr ◇ <https://symoon9.github.io/>

EDUCATION

Seoul National University , College of Liberal Studies <i>B.S. in Computer Science & Engineering</i> <i>B.S. in Cognitive Neural Computation (student-designed major)</i>	Mar 2019 - Aug 2024 (Expected) Seoul, Korea
University of Washington <i>Exchange Student</i>	Mar 2023 - Jun 2023 Seattle, WA

RESEARCH EXPERIENCE

AI for Biomedical Sciences Lab , School of Computer Science and Engineering, UW <i>Undergraduate Researcher (Advisor: Su-In Lee)</i>	Mar 2023 - Present Seattle, WA
· Developed scalable graph neural network for spatial transcriptomics	
Connectome Lab , Department of Psychology, SNU <i>Undergraduate Researcher (Advisor: Jiook Cha)</i>	Jun 2020 - Dec 2022 Seoul, Korea
· Calculated Genome-wide polygenic score via PRSice-2 for 25 phenotypes	
· Designed and conducted machine learning experiments to investigate the correlation between DNA and suicidality	
· Conducted moderated mediation analysis via structural equation model to investigate the impact of early life stress on children's intelligence score	
Artificial Society , Start-up Company <i>AI Researcher (Part-time)</i>	Mar 2022 - Jul 2022 Seoul, Korea
· Developed deep learning model for detecting face landmarks while reading an article on mobile devices	
· Developed metric for evaluating concentration level while reading when people with difficulties in reading read text through mobile devices	
Applied Data Science Lab , Department of Intelligence and Information, SNU <i>Undergraduate Researcher (Advisor: Wonjong Rhee)</i>	Jul 2021 - Aug 2021 Seoul, Korea
· Extracted features using Fourier transformations to catch peaks and calculate the entropy from biosignal data	
· Conducted deep learning experiments using Transformers and CNNs to predict cardiovascular disease from ECG data

POSTER & ABSTRACTS

S. Moon, E. Weinberger, S. Lee, **Towards scalable embedding models for spatial transcriptomics data**, *submitted*, 2023. [\[abstract\]](#)

S. Moon, E. Weinberger, S. Lee, **Scalable embedding model for spatially-resolved transcriptomics data**, *Allen School Undergraduate and Master's Research Showcase*, 2023. [\[poster\]](#)

H. Wang, **S. Moon**, Y. Y. Joo, E. Lee, J. Cha, **Genes, Early Life Stress, Brains, and Cognition: A Moderated Mediation Analysis**, *Biological Psychiatry*, 2021. [\[abstract\]](#)

PROJECTS

Digital Barrier Free Jan 2023 - Present

- Led developing Chrome extension for blinded and low-vision people
- Applied optical character recognition (OCR) and image captioning to accommodate enhanced web accessibility to visually impaired people

Data Augmentation Using Feature Attribution in NLP Sep 2022 - Dec 2022

- Refined Cutoff algorithm (Shen, 2020) using LRP-based feature attribution

Web Project for Real-time Weather Tweets (NowSee) Sep 2022 - Dec 2022

- Developed an idea of a real-time weather community
- Designed UI & UX, and developed front-end (React) and back-end (Django) features

SNU Fast MRI Challenge Jul 2021 - Aug 2021

- Preprocessed fMRI k-space data, and developed MRI super-resolution model using U-Net, CNN, and Vision Transformer to generate full MRI images from under-sampled MRI

SCHOLARSHIP & AWARDS

Forest of Talent, Korea Foundation for Advanced Studies Mar 2022 - Feb 2024

- Training program for future leaders (\$4,000 of scholarship and \$8,000 for 1-year project)

Undergraduate Scholarship, Korea Foundation for Advanced Studies Sep 2020 - Feb 2022

- Total \$6,000 of scholarship

LEADERSHIP, MENTORING & OUTREACH

Brain Cognitive Science Community Sep 2021 - Jun 2022

- Organized and participated study groups Reading and the brain ([poster](#)) and Synesthesia and cross-modality

Woori Narae, Student Association for Volunteer Tutoring North Korean Defectors Mar 2019 - Feb 2021

- Formal president (Mar 2020 - Feb 2021), tutored mathematics and English to three students

Volunteer work at Siloam Center for The Blind Jan 2020

- Participated in making digital books for the blinds

SKILLS

Computer Languages	Python, R, C, Java, Java Script, Type Script
Frameworks	Pytorch, Scikit-learn, React, Django
Data Processing	Genetic data, MRI, ECG
